

# Animated Graphs

Douglas Araujo

4 Nov 2020, DataViz meeting

## Key Takeaways

- Animated graphs are a great addition to your data-based communication toolbox.
- *Coding* an animated graph is straightforward - thinking about *what to animate* is the bit that takes most of your time.
- Please don't over do it.

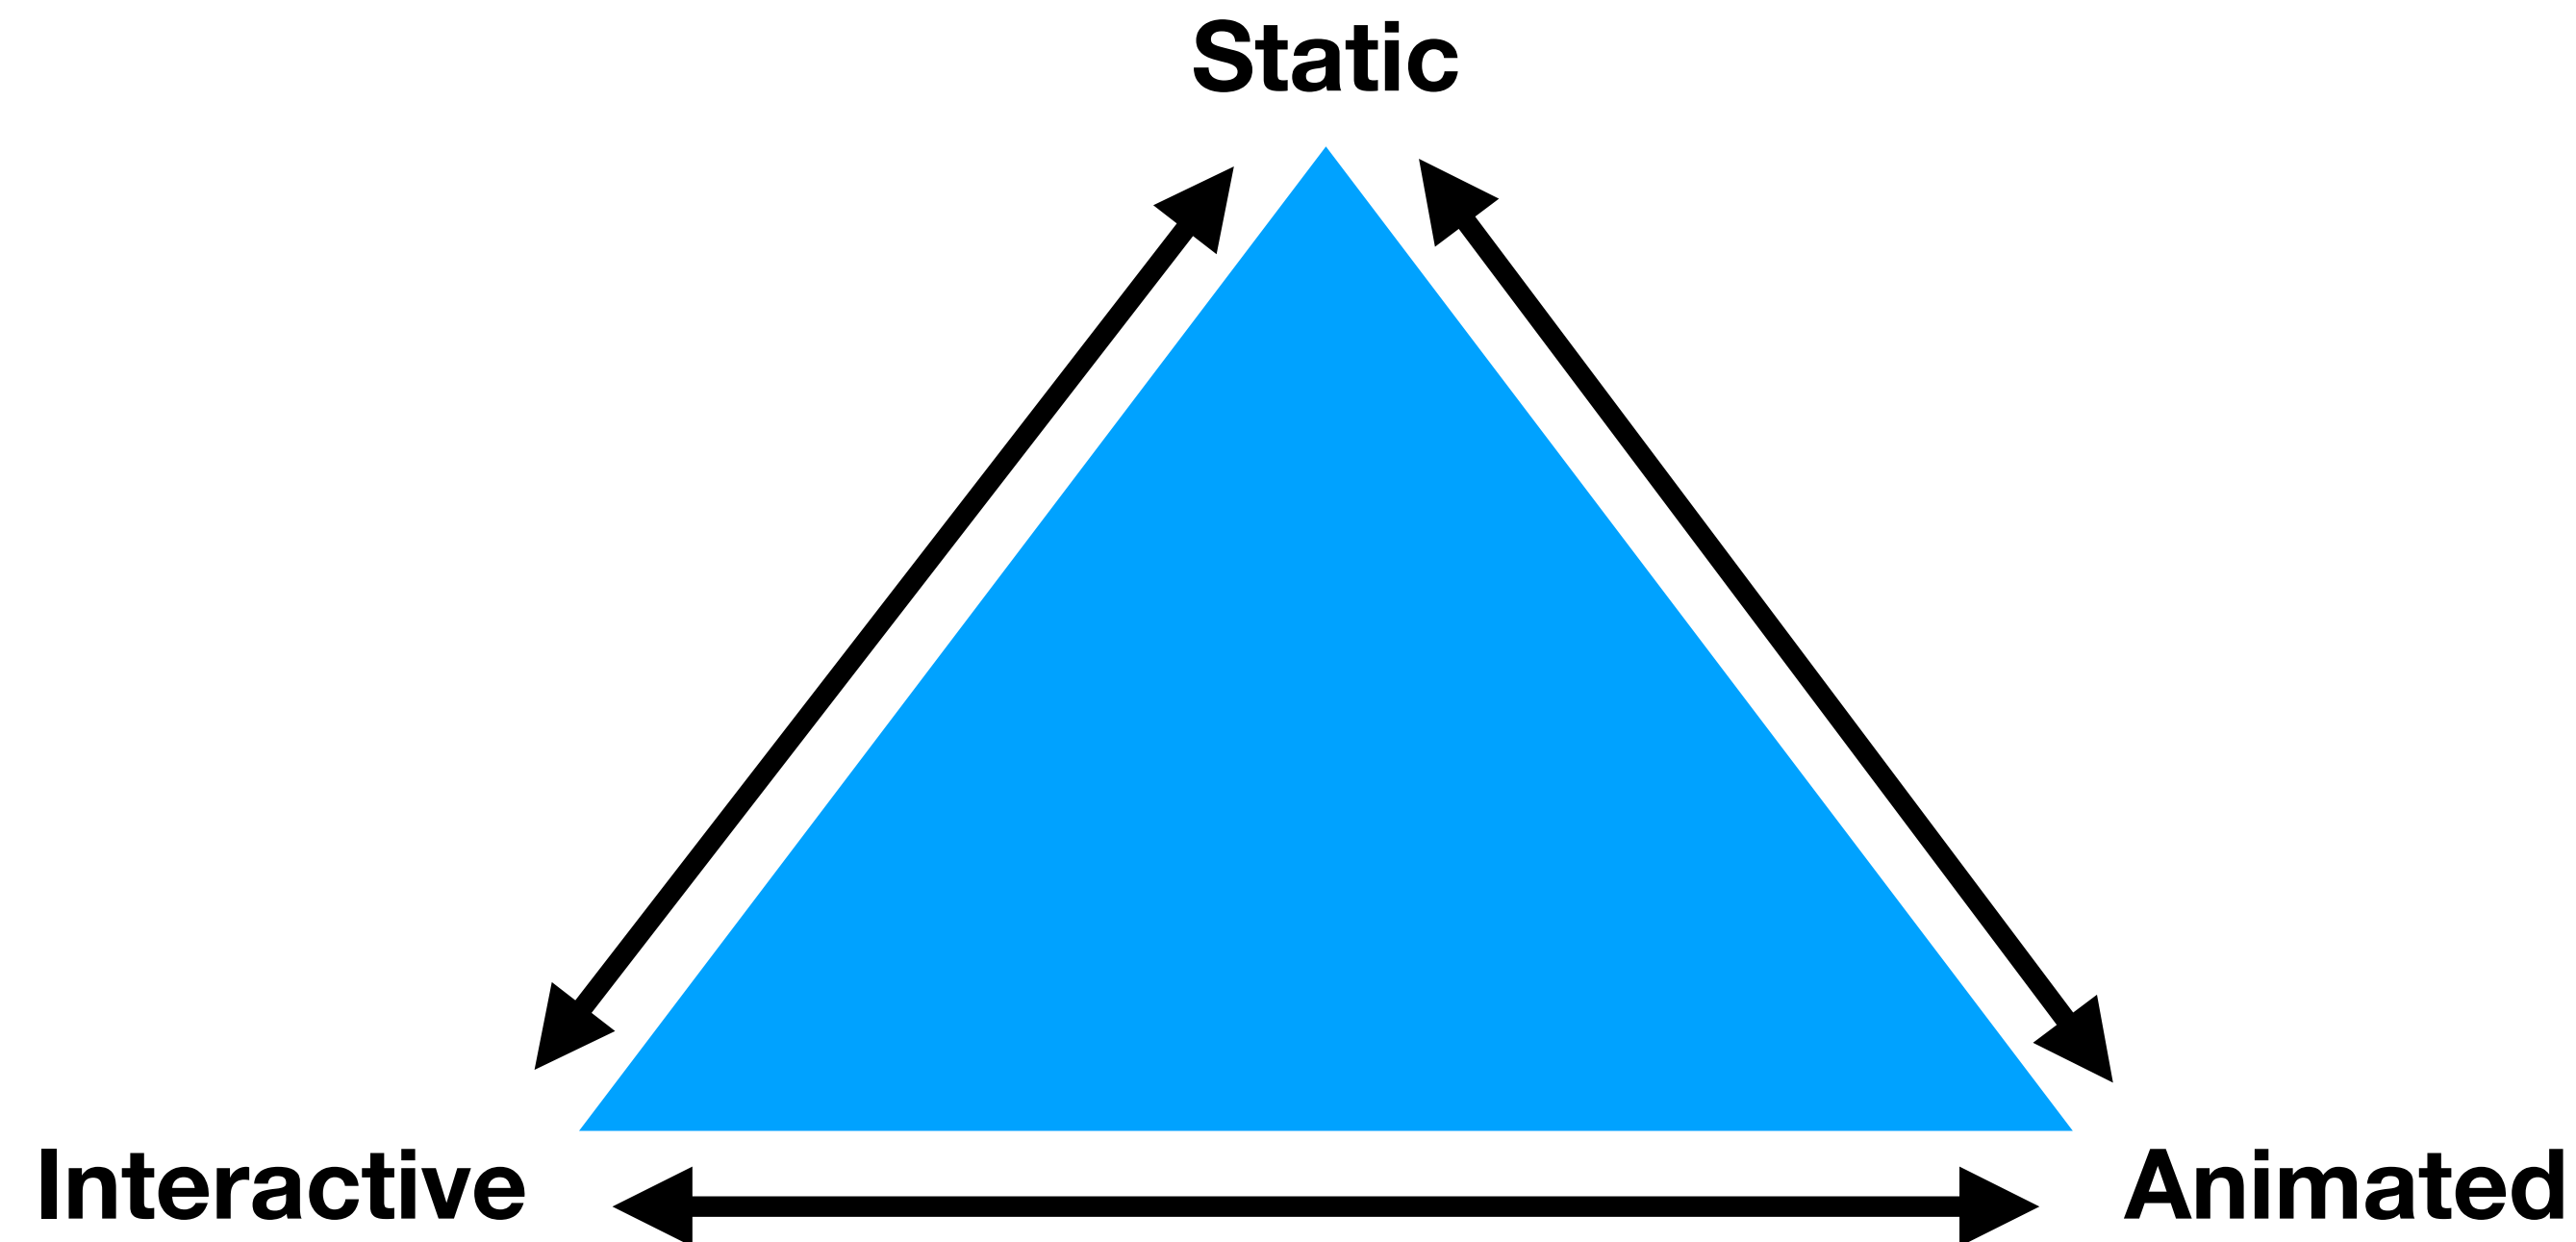

# What are animated graphs?

- *Static vs Interactive vs Animated* graphs
- Which is better? It depends...

# What are animated graphs?

- Nuances between static, animated and interactive graphs

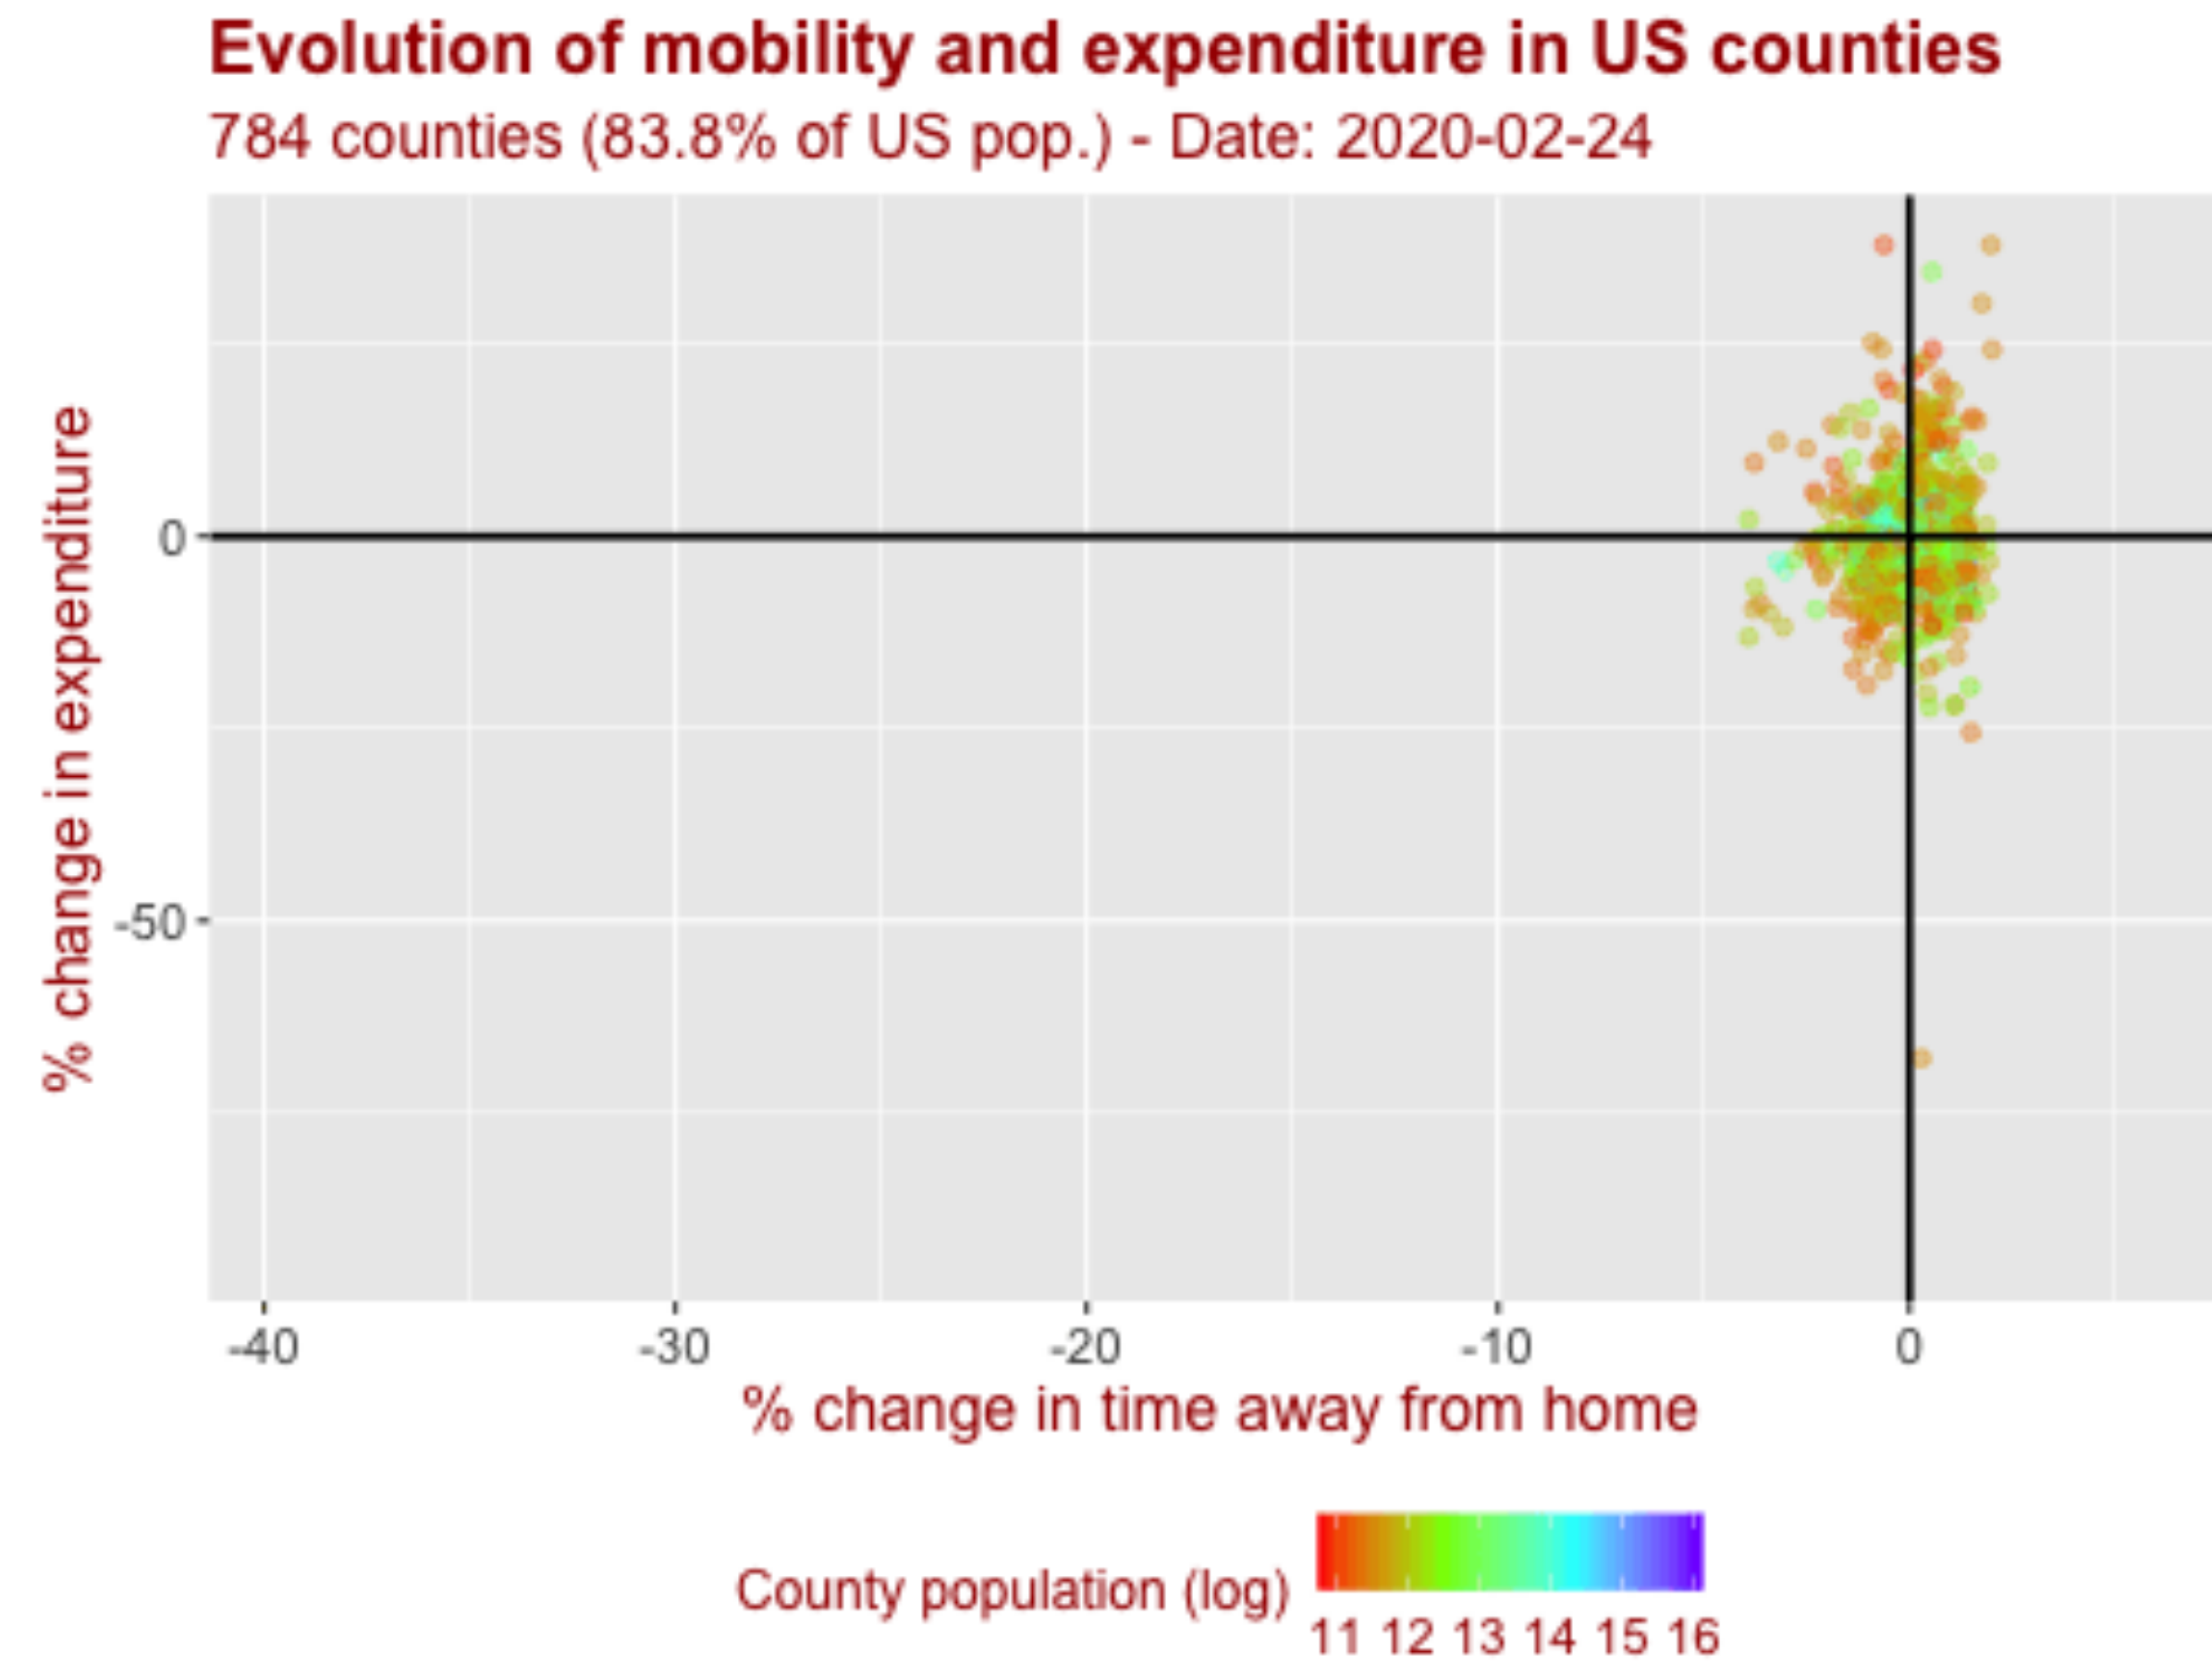

# Why & when to use animated graphs?

- Highlight one of the dimensions.
- Add another dimension (usually time).
- They are strong attention grabbers! So don't over do it.
